THE TYRRHENIAN PEARL MPA

MARATEA COAST

**MARATEA (PZ), IS A LITTLE TOWN IN
BASILICATA (ITALY)**

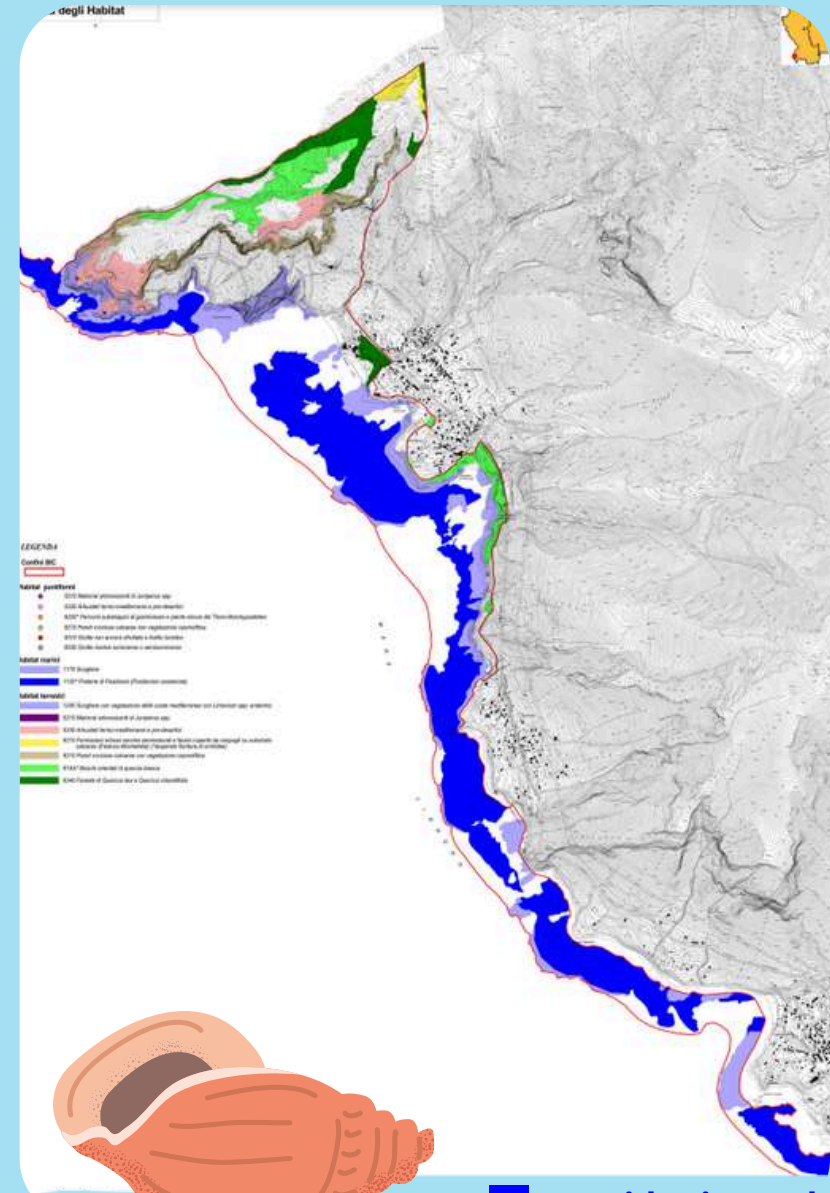

HABITATS

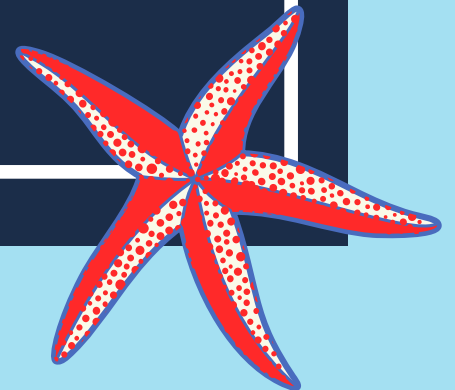

Maratea coast overlooks the Tyrrhenian sea, is a rocky coast with a rocky seabed and is characterized by high biodiversity because it is rich of particular habitats as sea caves, cliffs, Posidonia meadows ecc.

■ Sea caves

■ Posidonia meadows
■ Cliffs

BIODIVERSITY

Posidonia oceanica

Cladocora caespitosa

Yellow Gorgonian

Sea urchin

Posidonia meadow are considered a priority marine habitat, fundamental for the whole marine ecosystem

BIODIVERSITY

Caretta caretta

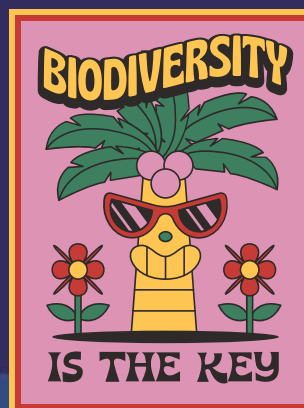

Octopus

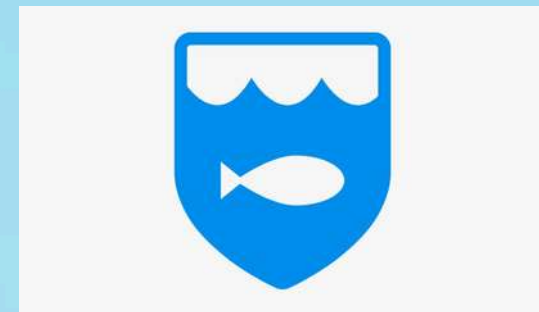

Sea star

A lot of “commercial
fishes”

For years there has been talking about making a Marine Protected Area in the Maratea coast, but the area is still lacking!

Maratea's economy in the past was focused more on maritime trade, nowadays it is mainly based on seaside tourism, also thanks to the numerous awards won by its magnificent beaches (blue flag, blue guide, etc.). Part of the local population lives off fishing activities and a lot of Maratea's typical dishes are based on the local fishery .

Socio-economical analysis

SAPRI

MARATEA

PRAIA A MARE

We also consider two other cities near Maratea's coast that could be affected by the MPA: Sapri, a city in Campania with an economy mainly based on tourism but also on fishing and port activity.

Praia a mare, a city in Calabria with a very strong beach tourism and is also an important textile district in the Calabria region.

Maritime Borders

The coast of Maratea is within the baseline and the area in which this hypothetical MPA should be erected is located inside the Internal Waters (also inside the Italian EEZ) so the State would have the same sovereign jurisdiction over it as over any other territory.

TERRITORIAL SEAS

INTERNAL WATERS

HYPOTHETICAL MPA

MPA

There are some existing ordinances for the Maratea's coast:

ORDINANCE 9/93 1993

ENACTED BY : "UFFICIO CIRCONDARIALE MARITTIMO DI MARATEA"

The sea area surrounding the islet of Santo Janni, near the Port of Maratea, for a width of 300 meters from the coast of the islet itself, is forbidden to divers equipped with self-contained breathing apparatus and to fishing except for that exercised with gillnets not anchored to the bottom due to the presence of ancient materials consisting of anchor logs, amphorae and other ceramic wards dating mainly from the Hellenistic-Roman period. **It is, moreover, prohibited to collect materials of any kind and nature from the seabed.**

ORDINANCE 1/12 2012

ENACTED BY : REGIONE BASILICATA

The **sea area up to 200 meters from the beaches and up to 100 meters from the cliffs is, as a priority, reserved for bathing during the bathing season.**

REGIONE BASILICATA

ORDINANCE 21/10 2010

ENACTED BY : "UFFICIO CIRCONDARIALE MARITTIMO DI MARATEA"

In the **waters** of the **Maratea maritime district**, **it is prohibited to:**

a. **anchoring, trawling and the exercise of any activity on the seabed, at a distance of less than five hundred (500) meters from the pipelines and submarine cables.**

b. **navigation at a distance of less than 100 meters from sea areas where there are outcropping reefs, shoals and soft reefs;**

c. **navigation, stopping, anchoring, fishing, bathing and any other surface and underwater activities in the body of water where aquacultures are present**

d. **the navigation, stopping and anchoring of naval units, bathing and any other surface and underwater activities in the body of water in front of rocky ridges up to a distance of 100 meters from the coast.**

In the Maratea's coast area there are 3 Natura-2000 areas:

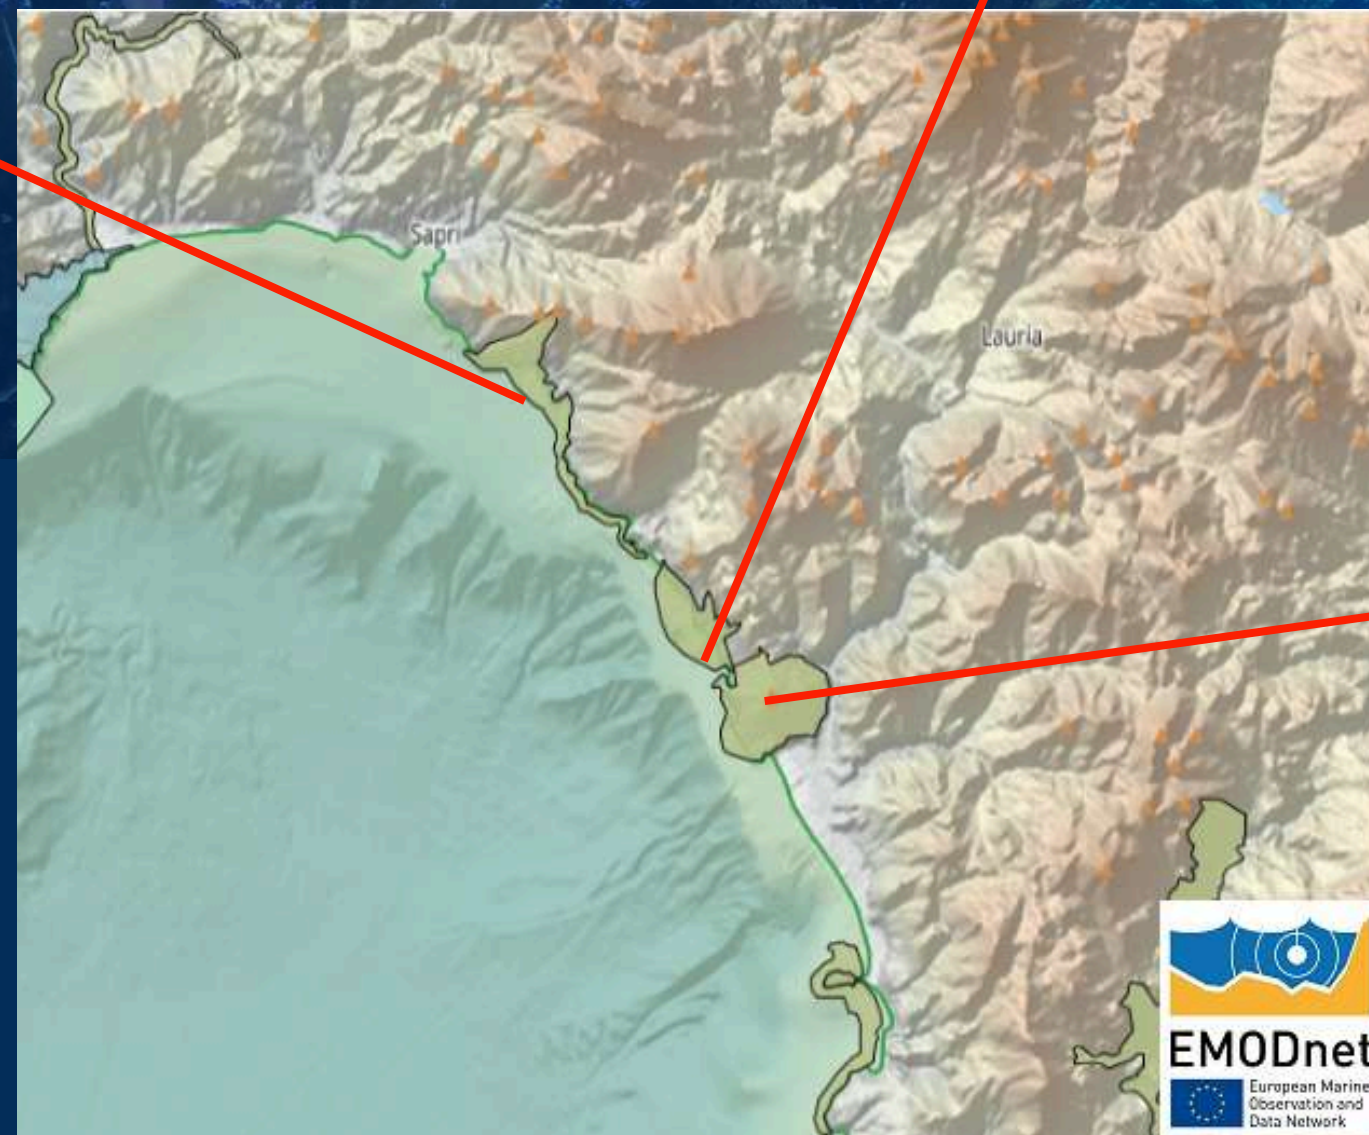

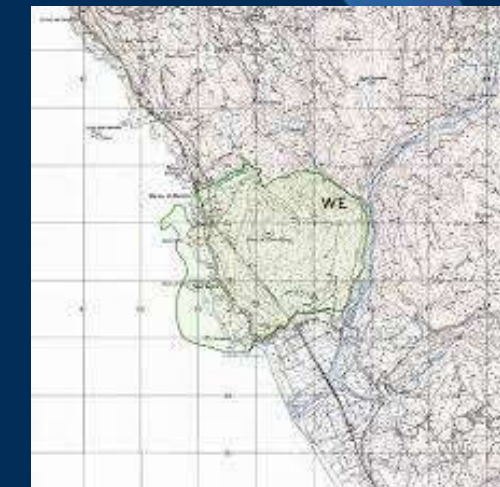

**ACQUAFREDDA DI
MARATEA (SCI)
CODE IT9210015**

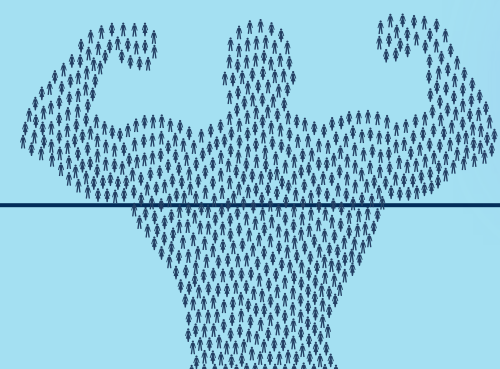

**ISOLA DI SANTOJANNI
E COSTA
PROSPICIENTE (SCI)
CODE IT9210160**

**MARINA DI
CASTROCUCCO (SCI)
CODE IT9210155**

SWOT ANALYSIS

Strengths

- **PRESERVATION OF THE MANY BIODIVERSITY HOTSPOTS IN THE AREA (POSIDONIA MEADOWS, SEA CAVES, CLIFFS, ETC.);**
- **IMPROVED REPRODUCTIVITY OF ORGANISMS, RESULTING IN BETTER FISHING PERFORMANCES IN AREAS NEAR THE MPA.**

- **INTERFERENCE WITH FISHING AND PORT ACTIVITIES;**
- **LONG BUREAUCRATIC TIME AND LIMITED ECONOMIC RESOURCES;**
- **TENDENCY TO GIVE GREATER IMPORTANCE TO ECONOMIC INTERESTS THAN TO ENVIRONMENTAL PROTECTION.**

- **INCREASING OF TOURISM;**
- **VALORIZATION OF THE GEOGRAPHICAL-CULTURAL RESOURCES IN THE AREA (THE ROMAN AGE ARCHAEOLOGICAL DEPOSIT AROUND THE ISLAND OF SANTOJANNI IS ONE OF THE LARGEST IN THE MEDITERRANEAN SEA);**
- **DEVELOPMENT OF DIVING ACTIVITIES (THERE IS ONLY ONE DIVING CENTER IN THE WHOLE AREA).**

- **HIGH NUMBER OF PRIVATE YACHTS IN THE AREA;**
- **ILLEGAL FISHING**
- **DIFFICULTY IN MAKING THE SKEPTICAL PART OF THE POPULATION UNDERSTAND THE BENEFITS AND IMPORTANCE OF AN MPA.**

My proposal:

Implementing the 3 Natura 2000 sites, already existing in this area, mainly focused on terrestrial biodiversity conservation, merging their marine portions together into one large MPA, called “The Tyrrhenian Pearl MPA”, that can also effectively protect the marine ecosystems of the area.

1. ACQUAFREDDA DI MARATEA
2. ISOLA DI SANTOJANNI E COSTA PROSPICIENTE
3. MARINA DI CASTROCUCO

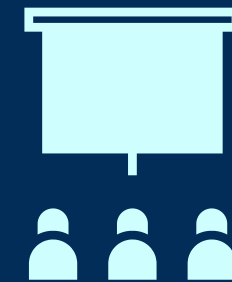

FREE INTERACTIVE EXHIBITIONS AND SEMINARS

**TO RAISE AWARENESS OF THE
IMPORTANCE OF MPA IN PROTECTING THE
BIODIVERSITY OF THE AREA AND ITS
HABITATS.**

LESSONS IN LOCAL SCHOOLS

**IT IS IMPORTANT TO EXPLAIN TO YOUNG
PEOPLE IN AN INTERACTIVE AND
ENGAGING WAY THE IMPORTANCE OF
BIODIVERSITY.**

COMMUNICATION AND PARTICIPATION

SOCIAL PROMOTION

**CREATING CONTESTS AND WITH
PROMOTION ON THE MAJOR SOCIAL
PLATFORMS.**

MEETINGS

**AMONG INSTITUTIONS, LOCAL
ASSOCIATIONS, STAKEHOLDERS AND NGO
REPRESENTATIVES TO DISCUSS THE
BENEFITS OF MPA AND DEVELOP THE
BEST POSSIBLE PLAN.**

ECONOMIC PLAN

TOT. AMOUNT: 100.000€

ACTIVITY	STRATEGY	OBJECTIVE	AMOUNT
 FREE INTERACTIVE EXHIBITION AND SEMINARS	BASED ON THE COLLABORATION BETWEEN LOCAL INSTITUTIONS, NGOS (LEGAMBIENTE, WWF AND MAREVIVO) AND UNIVERSITIES CAN BE SET-UP ACTIVITIES, CHAIRED BY EXPERTS AND SUPPORTED BY UNIVPM MARINE BIOLOGY STUDENTS, IN WHICH THE ENTIRE COMMUNITY CAN PARTICIPATE FOR FREE	INCREASING THE AWARENESS OF THE POPULATION ABOUT THE IMPORTANCE OF THE LOCAL MARINE BIODIVERSITY AND OF THE LOCAL HABITATS, ALSO GIVING INFORMATION ABOUT WHAT AN MPA IS	3 SEMINARS = 5000€ 1. POSIDONIA MEDOWS ALONG MARATEA COAST AND THEIR BIOLOGICAL IMPORTANCE 2. MARATEA COAST FAUNA BIODIVERSITY 3. HUMAN IMPACTS ON MARATEA MARINE ECOSYSTEM SEA-LIFE INTERACTIVE EXHIBITION = 10.000€ TOTAL = 15.000€
 INFORMATIVE PROJECTS/LESSONS IN LOCAL SCHOOLS	TAKING A GROUP OF LESSONS/PROJECTS IN THE LOCAL SCHOOLS (ELEMENTARY AND MIDDLE SCHOOL MAINLY), CHAIRED BY EXPERTS AND NGO REPRESENTATIVES, IN WHICH KIDS CAN ACTIVELY TAKE CONCIOUSNESS ABOUT THE COVERED TOPICS	EXPLAINING TO THE YOUNG PEOPLE THE IMPORTANCE OF BIODIVERSITY AND OF PRESERVING THE LOCAL HABITATS GIVING TIPS ABOUT HOW TO ACTIVELY CONTRIBUTE TO THEIR PRESERVATION	15.000€

LOCATION: CONFERENCE ROOM GRAND HOTEL PIANETAMARATEA

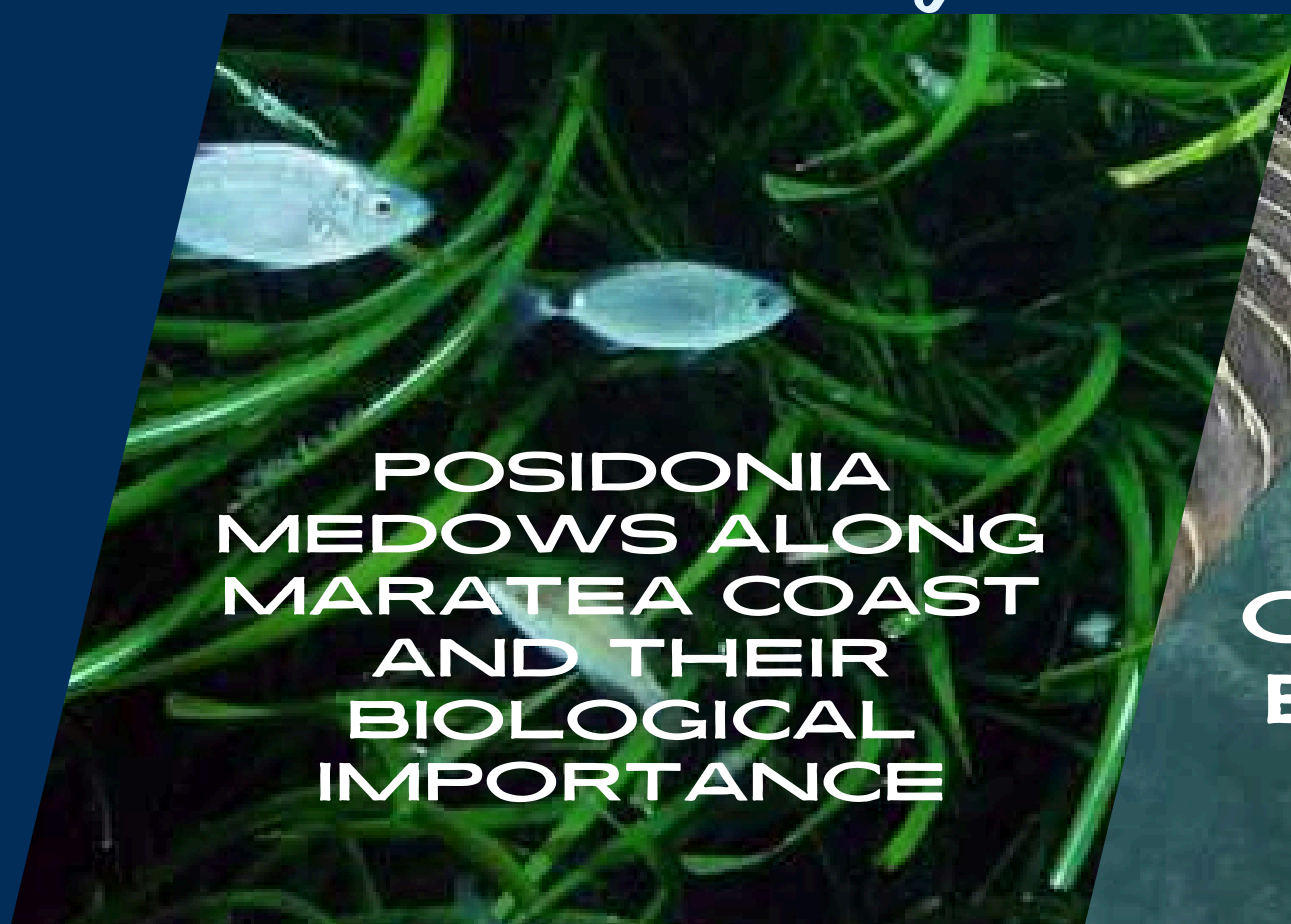

Monday

Wednesday

Friday

*Sunday: Sea - life interactive exhibition at Palazzo De Lieto (Maratea)
Free Entrance!*

LEGAMBIENTE

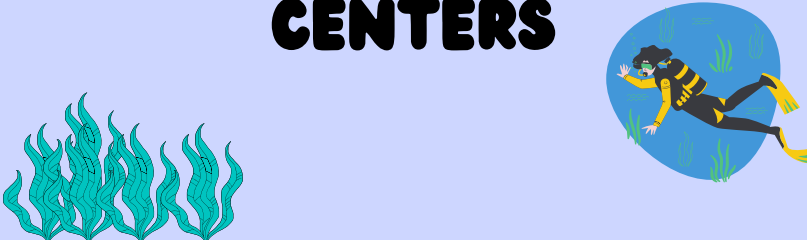

ECONOMIC PLAN

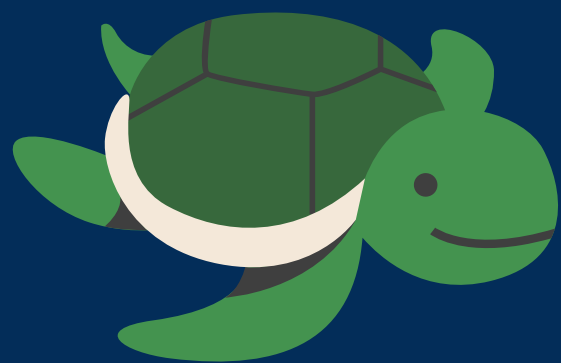

ACTIVITY	STRATEGY	OBJECTIVE	AMOUNT
SOCIAL PROMOTION 	STARTING A CONTEST ABOUT THE CREATION OF A PROMOTIONAL SHORT FILM AND ANOTHER ONE FOR THE LOGO/FLAG OF THE MPA, WITH THE SUBSEQUENT PROMOTION OF THE SHORT FILM ON THE MAIN SOCIAL PLATFORMS AND THE DISTRIBUTION OF THE MPA LOGO STICKERS AMONG THE POPULATION	THE AIM OF THE THE CONTESTS IS TO CREATE A SENSE OF BELONGING TOWARD THE MPA AMONG THE POPULATION, OBTAINING AT THE SAME TIME LOW-COST PROMOTIONAL MATERIALS, WITH SOCIAL PROMOTION THAT IS ESSENTIAL NOWADAYS	1ST PRIZE SHORT FILM CONTEST = 1500€ 1ST PRIZE LOGO CONTEST = 500€ 20.000 STICKERS = 1000€ SOCIAL PROMOTION = 8000€ TOTAL = 10.000€
MEETINGS 	ORGANIZING MEETINGS AMONG LOCAL INSTITUTIONS, ASSOCIATIONS (PRO-LOCO MARATEA "LA PERLA" AND A.A.M.), NGO REPRESENTATIVES AND REPRESENTATIVES FROM THE SCIENTIFIC COMMUNITY COMING FROM UNIBAS AND UNIVPM IN ORDER TO DISCUSS THE BENEFITS OF MPAS AND TO DO MANAGEMENT PLANS	DEVELOPING THE BEST PLAN POSSIBLE, TAKING IN ACCOUNT BOTH THE ENVIRONMENTAL AND THE LOCAL POPULATION NEEDS	5000€

ECONOMIC PLAN

ANDREA CALOCERO MATR : 1115399

ACTIVITY	STRATEGY	OBJECTIVE	AMOUNT
SCIENTIFIC RESEARCH 	LOCAL FLORA AND FAUNA MARINE BIODIVERSITY RESEARCH AND HUMAN IMPACT ON THE LOCAL ECOSYSTEM RESEARCH, INVOLVING MARINE BIOLOGY STUDENTS AND PHD STUDENTS FROM UNIVPM	IMPROVING THE SCIENTIFIC RESEARCH ABOUT THE LOCAL MARINE BIODIVERSITY AND THE HUMAN IMPACTS ON IT	32.500€
UPGRADE OF DIVING CENTERS 	UPGRADE OF DIVINGS AS THE "MARATEA SUB-CIRCOLO SUBACQUEA", WHICH ARE CURRENTLY INEFFICIENT AND EXTREMELY LIMITED IN THE MARATEA'S COAST AREA	MAKE TOURISTIC USE OF THE GREAT MARINE BIODIVERSITY AND LOCAL HABITATS BY TRYING TO REPLACE SPEARFISHING ACTIVITIES, WHICH WILL BECOME ILLEGAL, WITH RECREATIONAL DIVINGS	15.000€
COMPARISON EVENT AMONG FISHERMEN LIVING IN AREAS NEAR MPAS 	ORGANIZE AN EVENT IN WHICH DIFFERENT FISHERMEN, COMING FROM DIFFERENT AREAS NEAR MPAS, CAN DISCUSS ABOUT HOW MPA HAS CHANGED THEIR WORK	LOCAL FISHERMEN CAN THUS UNDERSTAND, FROM THE DIRECT EXPERIENCE OF OTHER COLLEAGUES, THAT MPA WON'T AFFECT THEIR WORK AND IS EVEN BENEFICIAL IN THE LONG RUN	6500€

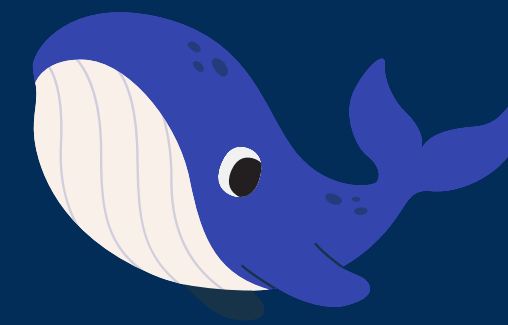

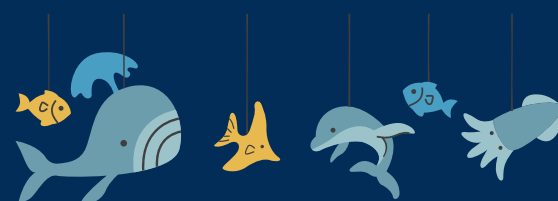

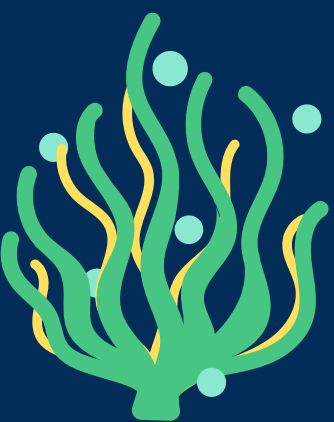

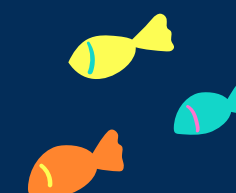

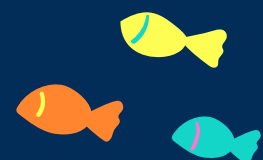

+ 1000€ to write a report of all the activities
